Website 23/23

Selenium driving real Chrome against the live deployment

TEST_CONSOLE.PAGES.PY

● test_engineers_lists_real_people	1.92s
● test_work_orders_groups_nearby_complaints	0.63s
● test_budget_planner_funds_repairs	0.77s
● test_assignment_optimiser_proposes_work	0.64s
● test_material_estimate_offers_a_surface	0.59s
● test_audit_log_is_not_empty	0.66s
● test_assistant_page_loads	0.64s
● test_new_complaint_form_is_usable	0.59s
● test_no_console_page_throws	0.58s

TEST_PUBLIC_SITE.PY

● test_landing_page_loads	0.82s
● test_headline_claims_are_present	0.86s
● test_public_pages_render[/about-about]	0.76s
● test_public_pages_render[/features-feature]	0.86s
● test_public_pages_render[/faq-faq]	0.71s
● test_public_pages_render[/contact-contact]	0.84s
● test_android_download_link_is_real	0.86s
● test_staff_login_page_renders	0.74s

TEST_STAFF_CONSOLE.PY

● test_wrong_password_is_refused	1.41s
● test_sign_in_reaches_the_console	1.23s
● test_dashboard_shows_real_figures	1.96s
● test_complaint_list_loads	1.92s
● test_complaint_detail_shows_model_output	2.71s
● test_gis_map_renders	1.42s

Mobile app 177/177

Screens, logic, and the live API contract

DETAILSCREEN.TEST.TSX

● when it is due › says how far overdue a late report is	0.19s
● when it is due › counts down while there is still time	0.00s
● when it is due › claims no deadline for a report merged into another	0.00s
● who has it › names the engineer rather than only saying Assigned	0.00s
● who has it › shows nothing at all when no one is assigned yet	0.00s
● a report merged into another › explains the rejection and offers the report being worked on	0.01s
● a report merged into another › counts other residents when theirs were merged into this one	0.00s
● saying it is not actually fixed › offers nothing while the report is still open	0.00s
● saying it is not actually fixed › asks once the report is closed	0.00s
● saying it is not actually fixed › will not send an empty reason	0.01s
● saying it is not actually fixed › sends the reason and shows the report as it comes back	0.01s

LOGINSCREEN.TEST.TSX

● shows the way in	0.12s
● sends exactly what was typed	0.01s
● hands the signed-in user back to the app	0.01s
● says why a refused sign-in failed, in the server's words	0.01s
● does not reach the network without an email	0.01s

REPORTSCREEN.TEST.TSX

● asks for a photograph before anything else	0.15s
● the location it attaches › names the street instead of printing coordinates	0.01s
● the location it attaches › falls back to the coordinates when no name can be found	0.00s
● the location it attaches › still attaches the location when the lookup fails outright	0.00s

ANALYTICS.TEST.TS

● AnalyticsService Tests › retrieves ward health metrics scorecard	0.00s
● AnalyticsService Tests › retrieves department efficiency reports	0.00s
● AnalyticsService Tests › calculates predictive hazard forecasts	0.00s
● AnalyticsService Tests › calculates smooth velocity moving average	0.00s

BACKENDCONTRACT.TEST.TS

● every route the app calls still exists › POST /api/auth/login	0.03s
● every route the app calls still exists › POST /api/auth/register	0.02s
● every route the app calls still exists › POST /api/auth/google	0.02s
● every route the app calls still exists › GET /api/auth/me	0.03s
● every route the app calls still exists › POST /api/auth/otp/request	0.02s
● every route the app calls still exists › POST /api/auth/email/verify	0.02s
● every route the app calls still exists › POST /api/auth/forgot-password	0.02s
● every route the app calls still exists › POST /api/auth/reset-password	0.02s
● every route the app calls still exists › GET /api/auth/biometric	0.02s
● every route the app calls still exists › POST /api/auth/biometric/enable	0.02s
● every route the app calls still exists › POST /api/auth/biometric/login	0.02s
● every route the app calls still exists › DELETE /api/auth/biometric/some-device-id	0.03s
● every route the app calls still exists › GET /api/complaints	0.00s
● every route the app calls still exists › POST /api/complaints	0.06s
● every route the app calls still exists › POST /api/complaints/preview	0.11s
● every route the app calls still exists › GET /api/complaints/CMP-10494	0.02s
● every route the app calls still exists › GET /api/complaints/CMP-10494/estimate	0.02s

● every route the app calls still exists › GET /api/complaints/CMP-10494/suggest-dimensions	0.02s
● every route the app calls still exists › POST /api/complaints/CMP-10494/measurements	0.02s
● every route the app calls still exists › POST /api/complaints/CMP-10494/transition	0.02s
● every route the app calls still exists › GET /api/notifications	0.02s
● every route the app calls still exists › POST /api/notifications/read	0.02s
● every route the app calls still exists › GET /api/engineers	0.02s
● every route the app calls still exists › GET /api/clusters	0.02s
● every route the app calls still exists › GET /api/assignment	0.02s
● every route the app calls still exists › POST /api/assignment/apply	0.02s
● every route the app calls still exists › POST /api/assistant	0.02s
● every route the app calls still exists › GET /api/audit-logs	0.02s
● the backend answers like an API › guards a protected route with JSON, not the website	0.02s
● the backend answers like an API › gives a refused sign-in a message the app can show	0.02s
● the backend answers like an API › hands a mobile client a token it can keep	0.02s

COMPONENTS.TEST.TS

● Comprehensive Mobile Architecture Verification Suite › safe routing engine multi-mode preference options	0.00s
● Comprehensive Mobile Architecture Verification Suite › field toolkit civil engineering formulas	0.00s
● Comprehensive Mobile Architecture Verification Suite › voice reporting keyword extraction and confidence bounds	0.00s
● Comprehensive Mobile Architecture Verification Suite › emergency hazard distance sorting with haversine logic	0.00s
● Comprehensive Mobile Architecture Verification Suite › tracking service SLA milestone progression completeness	0.00s

EMERGENCY.TEST.TS

● EmergencyService Tests › retrieves active hazard broadcasts sorted by distance	0.00s
● EmergencyService Tests › acknowledges a hazard broadcast	0.00s
● EmergencyService Tests › manages geofence subscriptions	0.00s

FIELDTOOLKIT.TEST.TS

- FieldToolkitService Tests › calculates accurate asphalt tonnage and excavation quantities 0.00s

FORMAT.TEST.TS

- compact › leaves small numbers alone 0.00s
- compact › shortens thousands, with a decimal only where it fits 0.00s
- compact › shortens millions 0.00s
- compact › survives nonsense rather than printing NaN 0.00s
- rupees › groups the Indian way, not in thousands 0.00s
- rupees › leaves three digits ungrouped 0.00s
- rupees › groups at four digits 0.00s
- rupees › keeps the sign in front of the symbol 0.00s
- rupees › rounds rather than showing paise 0.00s
- distance › uses metres below a kilometre 0.00s
- distance › switches to kilometres at a thousand 0.00s
- distance › refuses to render a negative distance 0.00s
- plural › uses the singular for exactly one 0.00s
- plural › uses the plural for none and for many 0.00s
- plural › takes an irregular plural 0.00s
- truncate › leaves short text alone 0.00s
- truncate › cuts on a word boundary when there is one 0.00s
- truncate › cuts mid-word rather than losing most of the text 0.00s
- humanise › turns a constant into a phrase 0.00s
- humanise › handles nothing 0.00s

GEO_PRIORITY.TEST.TS

- Geo and Priority Utilities Tests › geo distance and format calculation 0.00s
- Geo and Priority Utilities Tests › polygon point containment 0.00s
- Geo and Priority Utilities Tests › bounding box calculation 0.00s
- Geo and Priority Utilities Tests › coordinate string formatters 0.00s

● Geo and Priority Utilities Tests › priority score algorithm calculation	0.00s
● Geo and Priority Utilities Tests › SLA hours determination	0.00s
● Geo and Priority Utilities Tests › date formatters and SLA countdowns	0.00s
● Geo and Priority Utilities Tests › string taxonomy formatting	0.00s
● Geo and Priority Utilities Tests › math helpers	0.00s
● Geo and Priority Utilities Tests › data export CSV and GeoJSON	0.00s

GOOGLECONFIGURED.TEST.TS

● googleConfigured › is false when no client id is configured	0.38s
● googleConfigured › is true once a platform has an id	0.03s
● googleConfigured › does not treat an empty string as configured	0.03s

OFFLINESYNC.TEST.TS

● OfflineSyncService Tests › enqueues an outbox item when offline	0.00s
● OfflineSyncService Tests › removes an outbox item	0.00s
● OfflineSyncService Tests › updates and emits telemetry stats	0.00s

OUTBOX.TEST.TS

● queueing › starts empty	0.00s
● queueing › keeps what was queued, in order	0.00s
● queueing › gives every queued report its own id	0.00s
● queueing › records when it was queued	0.00s
● queueing › removes only the one asked for	0.00s
● queueing › survives a corrupted store rather than throwing	0.00s
● connectivity › is offline when the phone says it is disconnected	0.00s
● connectivity › treats an undecided reachability check as online	0.00s
● flushing › sends nothing while offline, and keeps the queue	0.00s
● flushing › sends what is queued and empties it	0.00s
● flushing › passes the photos and the location through unchanged	0.00s
● flushing › keeps a report the server could not take right now, and records why	0.00s

● flushing › drops a report the server will never accept	0.00s
● flushing › keeps a report rejected for an expired session	0.00s
● flushing › sends the rest when one of them fails	0.00s

ROUTE.TEST.TS

● RouteService Tests › calculates safe route options with safety scores	0.00s
---	-------

SLA.TEST.TS

● when a report is due › counts down in days while there is more than a day left	0.00s
● when a report is due › switches to hours inside the last day	0.00s
● when a report is due › says so plainly in the last hour rather than 'due in 0 hours'	0.00s
● when a report is due › reports overdue in hours just past the deadline	0.00s
● when a report is due › never says 'overdue by 0 hours' the moment it lapses	0.00s
● when a report is due › reports overdue in days once a day has passed	0.00s
● when a report is due › uses singular for one day, plural otherwise	0.00s
● when a report is due › shows when a finished report was completed, not a deadline	0.00s
● when a report is due › shows no deadline for a report merged into another	0.00s
● when a report is due › says nothing when the report was never given a target	0.00s

THEME.TEST.TS

● stageOf › puts a new report at the first stage	0.00s
● stageOf › treats every in-flight status as in progress	0.00s
● stageOf › treats closed, resolved and rejected as finished	0.00s
● stageOf › falls back to the first stage for anything unrecognised	0.00s
● stageOf › never returns an index outside the labels it is used with	0.00s
● tone › gives high and critical the same alarming pair	0.00s
● tone › is case-insensitive, because the API is not consistent	0.00s
● tone › always returns a foreground and a background	0.00s
● tone › does not use the same colour for foreground and background	0.00s
● statusLabel › turns a database status into something readable	0.00s

● statusLabel › handles a missing status without throwing	0.00s
● ago › says just now for the last minute	0.00s
● ago › counts minutes, then hours, then days	0.00s
● ago › falls back to a date beyond a month	0.01s
● ago › returns an empty string rather than NaN for nothing	0.00s
● ago › does not produce a negative age for a clock that is behind	0.00s

TRACKING.TEST.TS

● TrackingService Tests › fetches live complaint tracking with milestones	0.00s
● TrackingService Tests › submits an escalation request	0.00s
● TrackingService Tests › updates stage of milestone progression	0.00s

VALIDATE.TEST.TS

● isEmail › accepts ordinary addresses	0.00s
● isEmail › rejects the obvious mistakes	0.00s
● isEmail › ignores surrounding whitespace	0.00s
● isStrongEnough › asks for eight characters and nothing more	0.00s
● isBlank › treats whitespace as empty	0.00s
● isBlank › treats nothing as empty	0.00s
● isBlank › does not treat real text as empty	0.00s
● titleProblem › passes a reasonable title	0.00s
● titleProblem › asks for something when the box is empty	0.00s
● titleProblem › asks for more when it is too terse to route	0.00s
● titleProblem › stops a title that will not fit a queue row	0.00s
● isCoordinate › accepts a point in the demonstration city	0.00s
● isCoordinate › rejects null island, which is what a broken GPS reports	0.00s
● isCoordinate › rejects impossible values	0.00s
● isCoordinate › rejects a missing fix	0.00s

VOICE.TEST.TS

● VoiceService Tests › parses electrical hazard speech accurately	0.00s
● VoiceService Tests › parses water and drainage leak speech	0.00s
● VoiceService Tests › parses road pothole speech with landmark	0.00s
● VoiceService Tests › generates waveform metering array for UI	0.00s

WORKFLOW.TEST.TS

● the state machine › covers every status the backend can be in	0.01s
● the state machine › only ever moves to a status it also knows about	0.00s
● the state machine › never offers a move back to where you already are	0.01s
● the state machine › gives every move a label a person can read	0.00s
● the state machine › gives every move at least one role that can make it	0.00s
● the state machine › only names roles that exist	0.00s
● the state machine › ends at closed and rejected, and nowhere else	0.00s
● the state machine › lets a report reach a finished state from every live one	0.00s
● the state machine › never lets an engineer close or reject a complaint	0.00s
● the state machine › lets a supervisor act at every stage that has an action	0.00s
● isStaff › recognises the three staff roles	0.00s
● isStaff › does not let a citizen through	0.00s
● isStaff › is case-insensitive and safe on nothing	0.00s

Backend 5/5

The rules a one-time code has to hold

TEST

● a code is always six digits	0.00s
● codes are not predictable from each other	0.00s
● the stored hash does not reveal the code	0.17s
● an expired code is rejected by the expiry check	0.00s
● device tokens are long and unique	0.00s

The website suite runs against the live deployment at 140-238-246-75.sslip.io, so it tests what is actually deployed rather than a local copy. The app's contract tests call that same deployment. Regenerate with `python3 tests/make-report.py`.
